- These income figures exceed 85% of the State Median Income (SMI) for a family of the same size. Families at this level are not eligible for child care assistance.

In accordance with 45 C.F.R 96.85, each state's estimated median income for a four-person family is multiplied by the following percentages to adjust for family size: 52% for one person, 68% for 2 persons, 84% for three persons, 100% for four persons, 116% for five persons, and 132% for six persons. For each additional family member above six persons, add 3% to the percentage for a six-person family (132%), and multiply the new percentage by the state's estimated median income for a four-person family.

Note: Income amounts have been rounded up at .5 and above.
